JAKE & GLYNNIS

Jake finished varsity last year and has a good job at an investment company. Glynnis is a graphic designer. They were living in a commune but want a space of their own now.

They're both pretty creative. He's a muso; she loves gardening and cooking.

They're just starting out, and because they have big dreams to travel the world, they're very sensible with their cash. They're gregarious and fun loving and love to have people over. But they value their own personal space too and often spend Sundays just chilling.

JANE, BOBO & LISA

These three girls have been friends since school and now share a place together. Whilst they have very different jobs now, they have a lot in common.

They are vibrant and full of life and love to do gym and yoga together and also go out a lot as a group, trying out new restaurants and taking in the local music scene. Only Bobo has a car, which she is happy to share with her friends. They also have a common interest in charity work and spending a lot of time in the community, fundraising and helping out where they can.
